# Experience Self-Service eDiscovery

VenioOne OnDemand is a web-based, self-service eDiscovery solution that is intuitive and easy to use yet powerful.

- Suitable for the smallest to the largest sets of data
- Reduce overhead significantly and speed up eDiscovery workflows
- Free up project managers and other costly resources to work on bigger, more complex jobs
- Ideal for offices with remote users and little to no practice support staff
- Quick access to data from anywhere

**Has your team wished they could process and access the case data they receive quickly and easily?**

Venio has introduced a new and innovative solution for easily managing discovery and investigations. VenioOne OnDemand (VOD) is our cloud interface and is:

- The legal industry's only unified, automated, self-service user interface
- A full discovery platform on the back end
- Available as an add-on for existing VenioOne licenses or securely provided through a Venio partner

VOD is transforming eDiscovery by enabling attorneys and paralegals to manage their discovery projects from anywhere at anytime.

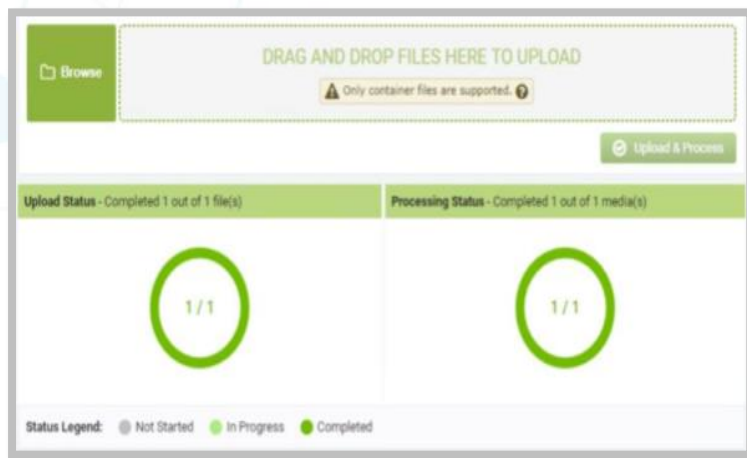

# Drag...Drop...and Discover

## Intuitively Designed

- Drag and drop raw native data directly into the browser
- Works in any browser
- Built-in email alerts and automated status notifications
- Search terms may be set and tagged on upload
- Access rights are permissioned and easily controlled

## Powerful Features & Benefits

- Supports 20+ archive formats, including PSTs, NSFs, and forensic containers
- High-speed uploads
- No FTP needed
- Fast and secure access to data

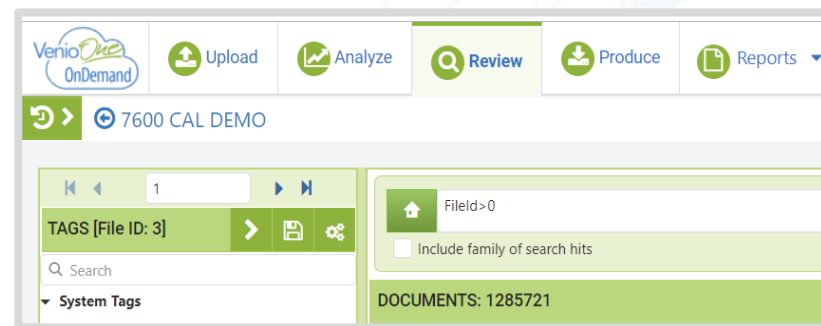

The ability to **access and analyze case data early** is key to:

- Identifying issues
- Reducing data volumes
- Reducing review costs

VOD notifies the right people throughout the project lifecycle to keep things moving quickly and securely.

VOD is designed to get you to the tools you need easily throughout **the full eDiscovery lifecycle.**

VOD is designed to be simple to use while **providing all of the functionality** of more complex platforms to support all of your eDiscovery project workflows.

# Secure Sharing and Collaboration

## Built-in Tools to:

- Secure portal for rapid data collection
- Collaborate using easy to access, secure links
- Share individual or groups of documents internally or externally
- Ideal for collecting data from remote locations or parties external to the organization.
- Grant full rights or read only access permissions
- Set expiration dates for enhanced security
- Use the platform for more than litigation data analysis

# Simply Powerful Review & Analytics

## Full Review:

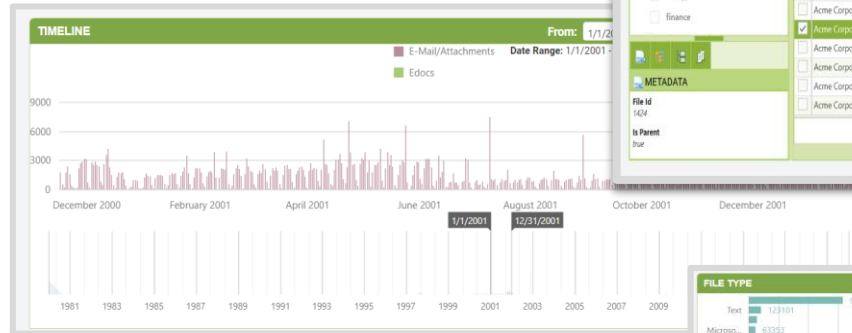

- Review your case or investigation data
- Create simple and complex searches
- User-customizable layouts
- Easily manage tags and tagging rules

Ideal for small to medium size cases. Easily switch to the full VenioOne platform at anytime to take advantage of its more **advanced features** such as Continuous Active Learning (CAL) and automated batch review.

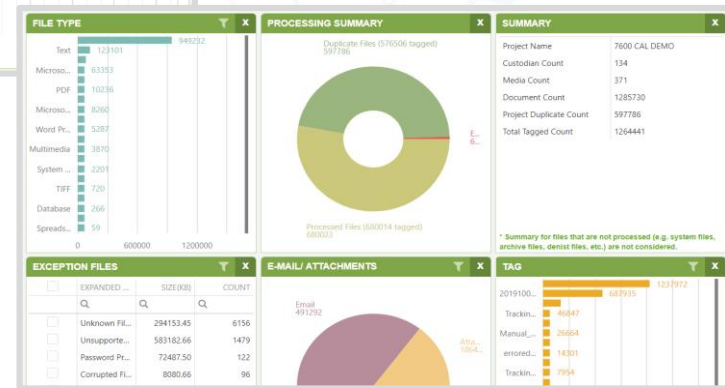

## Analysis Tools

- Visualize and filter results to quickly get to critical data
- Search, filter, cull, and tag without leaving the Analysis Dashboard
- Create and save multiple responsive dashboard layouts
- Custom widgets adjust to filters instantaneously

Uncover the story instantly with customizable, responsive dashboards that make searching, filtering and culling your data simple and fast.

Toggle easily between Review and Analysis dashboards to visually investigate selected data.

# One Solution to Many Challenges

## A Truly Unified Platform

- VenioOne and VOD are truly ONE discovery solution
- VOD is fully unified to VenioOne's environment
- Easily move from VOD to VenioOne to take advantage of the more advanced features in the platform
- Unlike other 'OnDemand' solutions, there is no migration of case data between VOD and VenioOne
- All work product is connected between the two solutions

Venio Systems is a team of customer-focused innovators and developers with 30 years of experience providing eDiscovery solutions.

VenioOne was created to address the industry's lack of a unified eDiscovery solution and is designed to provide law firms, corporations, and government entities with the ability to manage all phases of discovery and investigations – processing, ECA, analysis, review, and production – from a single software solution.

Our company remains at the forefront of innovation by working closely with our trusted partners and clients to bring the latest legal technology innovations. We utilize an agile approach to development and visible roadmap with updates being offered every two weeks.

*Based in the United States, VenioOne is currently used at top law firms, the two largest government agencies in the US, and by thousands of attorneys and solicitors through our partners in the US, Canada, UK/EU, and Asia.*
